CAREER OBJECTIVE

Motivated Computer Science Engineering student seeking a Business Development / Sales Internship at Lyftr AI. Interested in helping Indian MSMEs adopt AI-powered customer engagement solutions through market research, lead identification, clear product communication, customer relationship building, and continuous self-learning. Brings technical understanding of AI applications, adaptability, problem-solving ability, and willingness to learn sales processes in a remote team.

EDUCATION

Shri Vaishnav Vidyapeeth Vishwavidyalaya, Indore
Bachelor of Technology – Computer Science and Engineering
3rd Year, 5th Semester | CGPA: **8.98**
Expected Graduation: 2028

Class XII: 80% | 2024

Class X: 72% | 2022

RELEVANT SKILLS

- **Business Development:** Market research, lead identification, customer needs understanding, product pitching basics, follow-up planning
- **Communication:** Clear written communication, active listening, professional interaction, teamwork
- **Sales Mindset:** Adaptability, negotiation fundamentals, self-learning, problem-solving, target-oriented execution
- **Technical Knowledge:** AI/ML fundamentals, Python, data analysis, web applications, Streamlit
- **Tools:** Microsoft Office, Git, GitHub, MySQL

INTERNSHIP EXPERIENCE

AI Tech Gen Technologies — Python Programmer Intern

July 2026 – Present

- Worked on practical software development tasks, strengthening structured problem-solving and adaptability.
- Developed a **Mini Expense Tracker** project by applying programming concepts to a real-world use case.
- Improved the ability to understand requirements, learn independently, and complete assigned tasks.
- Practiced explaining technical work and project functionality in a clear and professional manner.

Hey Recruiting — Data Analyst Intern

March 2026 – May 2026

- Gained exposure to data handling, analysis, and organized reporting workflows.
- Developed attention to detail and problem-solving skills while working with data-related tasks.
- Learned to identify patterns and present information in a structured manner.

PROJECTS

AI Resume Analyzer

Python, Streamlit, PDFPlumber, NLP, Gemini API

- Built and deployed an AI-based application that analyzes resumes and provides ATS-oriented feedback.
- Developed an understanding of how AI products can solve practical user problems.
- Practiced presenting technical product features in a simple and user-friendly way.

Personal Portfolio Website

React, JavaScript, Tailwind CSS

- Created a professional portfolio website to present projects, skills, education, and certifications.
- Improved skills in presenting information clearly for visitors and potential recruiters.

Student Management System

Python, CustomTkinter, MySQL, CSV

- Developed a student record management application with search, dashboard, delete, and CSV export features.
- Focused on understanding user requirements and creating a useful workflow-based software solution.

WHY LYFTR AI?

Interested in Lyftr AI because it combines artificial intelligence, WhatsApp-based customer engagement, and business growth for Indian MSMEs. My technical background will help me understand AI-enabled products, while my interest in communication, market research, and customer-focused problem-solving motivates me to learn business development and contribute to sales activities.

CERTIFICATIONS

- Google Gemini Certification for Students
- Generative AI for Beginners — Simplilearn SkillUp
